

Recording Insights for Microsoft Teams

Protect your business and ensure you are meeting legal or compliance requirements

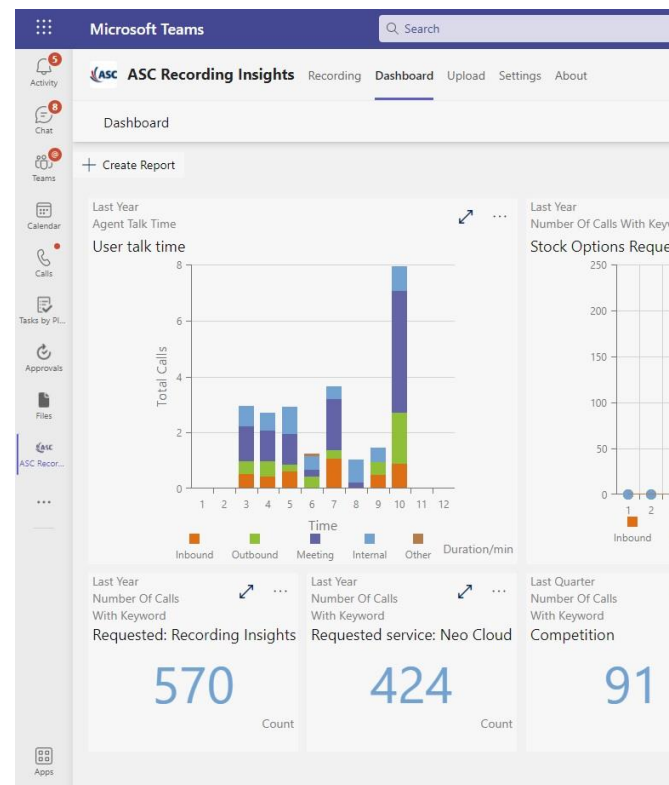

Get the Recording Insights app for Teams

Hybrid work is here to stay. However, the widespread adoption of Teams has also brought about certain challenges with compliance programs. Specifically, if your organization or industry is required to record customer conversations and electronic communications, it is crucial to ensure that these recordings are legal.

Create a collaborative compliance environment in Microsoft Teams

- Ensure compliance with legal regulations such as MiFID II, HIPAA, Dodd-Frank, FDCPA, etc.
- Omni-channel recording & archiving of all communications directly in Microsoft Teams
- Connected to Microsoft's Cloud for Financial Services
- Capture insights to improve business performance with Cognitive Services
